EDUCATION

Indian Institute of Engineering Science and Technology , Shibpur

2023 – 2027(present)

B.Tech-Information Technology- **CGPA - 9.37** (till 6th semester)

West Bengal, India

EXPERIENCE

Sasken Technologies Limited - (Winter Intern)

- Developed a **low-latency voice-to-text system with speaker analytics** during the internship period .
- Integrated the **OpenAI Faster-Whisper (Tiny)** model for **real-time speech transcription**.
- Implemented **emotion, gender, and speaker analysis**, achieving an end-to-end latency of **under 2 seconds** with structured **JSON** output.

PROJECTS

IT Help Desk Chatbot 🔗 | [Python](#), [PyTorch](#), [Streamlit](#), [NLTK](#)

- Developed an **NLP-based IT support chatbot** that analyzes user queries, classifies them into predefined **intents**, and provides **predefined responses**.
- Implemented **text preprocessing techniques** including **tokenization, stemming, and Bag-of-Words feature extraction** for accurate intent recognition.
- Built and trained a **neural network model using PyTorch** to improve intent classification performance.
- Created an **interactive Streamlit web application** with **authentication and chat history management** using database integration.

StudyMate AI 🔗 | [Python](#), [LangChain](#), [ChromaDB](#), [Streamlit](#)

- Developed an **AI-powered learning assistant** that enables users to upload **multiple PDFs** and ask **questions with context-aware answers** including **document sources and page-level citations**.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline** using **document ingestion, text chunking, embeddings, and vector similarity search** for efficient information retrieval.
- Integrated **topic-wise summarization, difficulty-based MCQ generation, and interactive answer evaluation with explanations** to enhance learning experience.
- Built and deployed a **Streamlit-based application** with backend integration using **LangChain, ChromaDB, Sentence Transformers, and Groq LLM API**.

Diabetes Predictor 🔗 | [Python](#), [Streamlit](#)

- Developed a Diabetes Prediction App using **Built a Diabetes Prediction App using Python, Streamlit, and XGBoost** to predict diabetes risk from user health parameters with **real-time confidence scores and health advice**.
- Trained and evaluated **multiple ML models** on the Pima Indians Diabetes Dataset, selecting the best-performing model based on **AUC and F1-score** for deployment.

TECHNICAL SKILLS

- **Programming Languages** : [Python](#) , [C++](#) , [C](#) , [Java](#)
- **Software Development** : [Object-Oriented Programming \(OOP\)](#) , [Data Structures and Algorithms \(DSA\)](#)
- **Web Development** : [HTML5](#) , [CSS3](#) , [JavaScript](#)
- **Tools , Libraries and Platforms** : [TensorFlow](#) , [PyTorch](#) , [VS Code](#) , [Git](#) , [GitHub](#) , [Pandas](#) , [NumPy](#) , [SciPy](#) , [scikit-learn](#) , [SQL](#) , [MS-Excel](#) , [MS-Power point](#)

ACHIEVEMENTS

- **UCO Bank Hackathon 2025** 🔗 : – Our **Team Buffer** has secured **3rd place** in the **Hackathon** organized by **UCO bank and IEST Shibpur** .
- **M-Code Hackathon** 🔗 : **2nd Place** – Led **Team Eunoia** in a Hackathon organized by **CodeIEST and Metallum**.
- Secured **3rd position** in the **Hyland Coding Challenge** during a 3-day **Industrial Exposure Program** by **Hyland Software Solutions**. 🔗
- Solved **1000+ Problems** on **LeetCode** , demonstrating **strong DSA algorithmic skills**.
- **2-star** **Coder** on **CodeChef** with a highest rating of **1521**
- **Academic Rank 3** in the department of *Information Technology* till the current semester .
